

## USEFUL LINKS

### GREEN CHEMISTRY LINKS

[Green Chemistry Network \(GCN\)](#) - The main aim of the Green Chemistry Network (York University) is to promote awareness and facilitate education, training and practice of Green Chemistry in industry, commerce, academia and schools

[Green Consumer Products Website](#) - the website aims to provide more information to consumers about the chemicals found in everyday products. It looks at the role of products and their mode of actions. It also addresses the issues of environmental impact and sustainability. This is a joint initiative between Boots and the University of York.

[Green Chemistry and Commerce Council](#) - The GC3 was formed in 2005 following *Sustainable Business and Safer Chemistry Through the Supply Chain: An the Innovators Roundtable* hosted by the Lowell Center for Sustainable Production and the Darden School of Business at the University of Virginia. The GC3 provides an open forum for participants to discuss and share information and experiences relating to advancing green chemistry and design for environment as it pertains to sustainable supply chain management.

[US EPA Green Chemistry website](#) - providing background information on green chemistry
